Cancer Patient Advisory Board

A Patient Voice for Cancer Services

East of England
Cancer Alliance 

We are the East of England Cancer Alliance **Patient Advisory Board**. If you are somebody affected by cancer you may be able to help us.

Across the country there are 19 networks of people and organisations involved in cancer care, called Cancer Alliances. They involve health professionals and patients.

It is only by listening to people in the midst of cancer that health services can be sure they are doing the best for every patient. Cancer Alliances help to make that happen by working with patients and families via the **Patient Advisory Board**.

We need to hear from you whatever your experiences and ideas. We believe that patients and their families are the experts and value all suggestions.

Cancer Alliances were developed as part of the National Cancer Strategy 2015-2020. They are charged with delivering real improvements for people locally, by leading a programme of work to improve standards of cancer prevention, diagnosis, treatment and support.

This is the Mission Statement of the **Patient Advisory Board**:

"Our purpose is to challenge and improve the way cancer services are provided for patients in the East of England. We will work inclusively to lead and drive new solutions, celebrating examples of excellence and bringing the views and experiences of patients, carers and families to inspire change where current standards and patient experience need to be improved."
